

Westfood

Products of Vietnam

INTRODUCTION

Established since 1992, WEST FOOD Company (WEST FOOD) specializes in processing and supplying canned and frozen fruits and vegetables, keeping the freshness and nutrition as just-picked vegetables and fruits.

Being located in the Mekong River Delta Region of Vietnam where many tropical fruits and vegetables are planted, WEST FOOD has always paid special attention and close cooperation with the farmers' high quality vegetable and fruit farms. Its material zone has been gradually invested to ensure the sustainable input.

After harvesting, fruits and vegetables are transported to the factory to process and pack right in the same day. Processing lines are carried out at the spacious, neat and tidy factory with modern machines under the close supervision of qualified and experts.

WEST FOOD products are certified with food safety such as HACCP, BRC, KOSHER, and licensed to export directly to the United States market by United States Food and Drug Administration (FDA).

Up to now, WEST FOOD products are widely available and loved in many regions, nations and continents throughout the world such as The United States, EU countries, Australia, Canada, Japan, Korea and the other Asian countries.

Thanks to the advantages of material zone, modern plant system, extensively invested R&D activities and dedicated employees, we strongly believe that we shall be a reliable partner, offering values to the you and your customers.

OUR MATERIAL ZONES

We have the advantage of being located in Mekong River Delta Region of Vietnam where there are many tropical fruit trees. During the development, we have worked and cooperated closely with the fruit and vegetable farms of the farmers. We have also step by step invested in the material zone of WEST FOOD to ensure the stable material source.

OUR FACTORY

At the present, WEST FOOD is owning 3 IQF production lines following the production standard of Europe to serve for processing frozen products with the capacity of thousands kilograms per hour and the 2 most advanced canning production lines in Can Tho which is operated with 85% of design capacity. It can be seen that the modern machines and equipment of WEST FOOD are of the same level and standards as those in South East Asia countries to meet the orders from countries throughout the world.
